102 Rejection of the Claims

Claims 25-33:

In response to Applicant's arguments that "... the reasoning of the Office Action has the play list configured from the third location (the client) when a user logs in instead of the first location" and that "[t]hus, Taylor does not teach or even suggest configuring a playlist of video files from a list network location ... in part by logging into the third location," it is respectfully noted that a user of Taylor would select the video files at the client (3rd location) using the option "Music/Playlists/Create Playlist" and then the playlist is assembled (configured) at the proxy server (1st network). It is noted that the claim language specifically recites "configured at least IN PART by logging into the 3rd location with a web browser" (emphasis added by examiner). The configuring in part by logging into the 3rd location with a web browser is considered to be properly anticipated by the action of the user logging into the Windows Media Player (WMP) browser to select the video/song files -- configu[ing] in part. The actual configuring is done at the proxy location (1st location).(see FIG. 6, step 615).

The claimed "executing the playlist" is anticipated by the playing of the playlist by the WMPand the "including pulling video content associated with two or more video files from the second network location over the network according to the playlist" is considered to be anticipated by Taylor in step 635 of FIG. 6.

Claim 34:

As correctly pointed out by Applicant, [0035] of Taylor indicates that a user uses a web browser to connect o (communicate with) to a media server such as proxy server 420. Therefore, the correct device that is equivalent to the claimed media server is the proxy server. The Office incorrectly indicates that the claimed media is the client 300. It should be the proxy server in order to be consistent with the reasoning set forth by the Office action in the rejection of claim 25. With the interpretation that the claimed media server is Taylor's proxy server, the Office considers that taylor meets the requirements of Claim 34.

Claim 25 and 34:

Contrary to Applicant's assertion, Taylor does disclose:

wherein th eplaylist (e.g., the playlist) includes at least one track (one video/picture/song/media clip),

wherein the track includes an identifier (media clip 1 or 2,-8) to select one or more of the number of the video files and includes at least one logical action relating to playing the playlist (retrieve media clip1 from http://www.media.com/file1.clp).

Contrary to Applicant's assertion, the claimed track can be reasonably interpreted as the track (see definition of track at www.dvdhelp.us/html/glossary.html).

103 rejection of the claims

1. With respect to Claim 1, for the features that are similar to those of claims 25 and 34, see discussion above.

In response Applicant's assertion that the disclosure teaching or suggestion of "a web client to communicate with each media server through the network to configure at least one playlist in the media server using a web browser, ... each media server configured to execute the playlist to control video content on the video display," it is noted that Ellis' [0006] does provide on-line program guides that allow users to view program listings using a web browser.

For the remaining features of the aformentioned limitation, see discussion above (Claim 25 and 34).

In response to Applicant's assertion that addition of the ability of a user to select play list would not add anything to the system of Ellis but a list already provided by Ellis (p. 12, last paragraph), it is noted that the ability to create a play list of video files can be used for creating a list of video files (e.g., programs) to be recorded (e.g., program reservation). Therfore, the teachings of Taylor can be combined wit that of Ellis.

2. Claim 10:

Contrary to Applicant's assertion that Rodriguez does not teach "wherein the logical actions include a number of times to play the files, it is noted that Rodriguez refers to a rental period selection screen and to a number of times to play the files in the playlist (see at least [0005]).

3. Claims 3-6, 11:

Since Applicant's arguments are the same as those discussed in Claim 25 and 34, the same response is thus applied.

4. Claims 12 and 13:

Since Applicant's arguments are the same as those discussed in Claim 25 and 34, the same response is thus applied.

5. Claim 21:

Since Applicant's arguments are the same as those discussed in Claim 25 and 34, the same response is thus applied.

Application No.
